COROTHANE® I GALVAPAC **1K ZINC PRIMER**

B65G11

GRAY

Revised: May 9, 2013

PRODUCT INFORMATION

5.14

PRODUCT DESCRIPTION

COROTHANE I GALVAPAC 1K ZINC PRIMER is a low VOC, moisture curing urethane zinc-rich primer. Designed for low temperature application to steel surfaces.

Low temperature application - down to 20°F (-7°C) NSF approved to Standard 61 for potable water

- Abrasion and chemical resistant

Easy to apply and recoat

- Usable for immersion service with recommended topcoated
- Resistant to mudcracking
- Meets Class B requirements for Slip Coefficient and Creep Resistance, .54
- Enhanced coating strength and edge protection with micaceous iron oxide addition

PRODUCT CHARACTERISTICS

Finish: Flat Color: Gray Volume Solids: 67% ± 2% Weight Solids: 91.7% ± 2% VOC (calculated): <340 g/L; 2.8 lb/gal Zinc Content in Dry Film: 83% ±2% by weight

Recommended Spreading Rate per coat Standard AWI

Standard Min. Max. Min. Max.

Theoretical coverage sq ft/ 1072 (26.2)

gal (m²/L) @ 1 mil/25 micron dft NOTE: Brush or roll application may require multiple coats to achieve maximum film thickness and uniformity of appearance. *See Recommended Systems on reverse side

Drying Schedule @ 5.0 mils wet (125 microns): @ 40°F/4.5°C @ 100°F/38°C @ 77°F/25°C

50% RH

To touch: 45 minutes 20 minutes 10 minutes

To recoat (minimum), atmospheric service:

8 hours 4-6 hours 1 hour

To recoat (minimum), immersion service:

24 hours 12 hours 10 hours

To recoat (maximum):

12 months 12 months 12 months

To cure, atmospheric service:

5 days 3 days 1 day

To cure, immersion service:

14 days 7 days

If maximum recoat time is exceeded, abrade surface before recoating Drying time is temperature, humidity, and film thickness dependent. For Potable Water Service, allow a minimum cure time of 7 days at 77°F (25°C) prior to placing in service. Sterilize and rinse per AWWA C652.

Shelf Life:

12 months, unopened Store indoors at 40°F (4.5°C) to

100°F (38°C).

Flash Point: Reducer/Clean Up: 94°F (34°C), PMCC Reducer #15, R7K15 (or)

Reducer #111, R7K111 for non-NSF, VOC

exempt applications

RECOMMENDED USES

- Immersion Service potable water: Meets NSF Standard 61 for use in potable water storage.

 250,000 gallon untopcoated

 20,000 gallon minimum topcoated
 Meets requirements of SSPC Paint Spec No. 40 for zinc rich

- moisture cure Urethane primer
- As a primer in a urethane coating system for bridges, tanks, chemical, and marine structures
- Ideal for priming water assisted abrasive blasted surfaces where flash rusting or blooming limits the use of conventional zinc rich
- Acceptable for use with cathodic protection with select topcoats Conforms to AWWA D102 Inside Coating System #3 (ICS-3), Inside Coating System #5 (ICS-5), Outside Coating System #2 (OCS-2), Outside Coating System #3 (OCS-3), Outside Coating System #4 (OCS-4), and Outside Coating System #6 (OCS-6) A component of INFINITANK

SURFACE PREPARATION

Surface must be clean, dry, and in sound condition. Remove all oil, dust, grease, dirt, loose rust, and other foreign material to ensure adequate adhesion.

Refer to product Application Bulletin for detailed surface preparation information.

Minimum recommended surface preparation:

Iron & Steel

Atmospheric: SSPC-SP6, 2 mil (50 micron)

profile preferred

Immersion, with recommended topcoat:

SSPC-SP10/NACE 2, 2 mil profile

APPLICATION BULLETIN

5.14

SURFACE PREPARATIONS

Surface must be clean, dry, and in sound condition. Remove all oil, dust, grease, dirt, loose rust, and other foreign material to ensure adequate adhesion.

Iron & Steel (immersion service)

Remove all oil and grease from surface by Solvent Cleaning per SSPC-SP1. Minimum surface preparation is Near White Metal Blast Cleaning per SSPC-SP10/NACE 2. Blast clean all surfaces using a sharp, angular abrasive for optimum surface profile (2 mils / 50 microns). Remove all weld spatter and round all sharp edges by grinding. Prime any bare steel the same day as it is cleaned or before flash rusting occurs.

Iron & Steel (atmospheric service)

Remove all oil and grease from surface by Solvent Cleaning per SSPC-SP1. Minimum surface preparation is Commercial Blast Cleaning per SSPC-SP6. For better performance, use Near White Metal Blast Cleaning per SSPC-SP10/NACE 2. Blast clean all surfaces using a sharp, angular abrasive for optimum surface profile (2 mils / 50 microns). Prime any bare steel the same day as it is cleaned or before flash rusting occurs.

APPLICATION CONDITIONS

Temperature:

air and surface 20°F (-7°C) minimum, 120°F (49°C)

maximum

material: 45°F (7°C) minimum

Do not apply over surface ice

Relative humidity: 30% minimum, 99% maximum

APPLICATION EQUIPMENT

The following is a guide. Changes in pressures and tip sizes may be needed for proper spray characteristics. Always purge spray equipment before use with listed reducer. Any reduction must be compliant with existing VOC regulations and compatible with the existing environmental and application conditions.

Reducer/Clean UpReducer #15, R7K15 (or) Reducer #111, R7K111 for non-NSF, VOC ex-

empt applications

Airless Spray

GRAY

APPLICATION PROCEDURES

Surface preparation must be completed as indicated.

Mix material thoroughly prior to use with a low speed power agitator until completely uniform. After mixing, pour through a 50 mesh filter.

Apply paint at the recommended film thickness and spreading rate as indicated below:

Recommended Spreading Rate per coat:				
	Standard		AWWA	
	Min.	Max.	Min.	Max.
Wet mils (microns)	4.5 112	6.8 170	3.0 75	6.0 150
Dry mils (microns)	3.0 75	4.0 100	2.0 50	4.0 * 100*
~Coverage sq ft/gal (m²/L)	268 6.5	358 8.8	268 6.5	536 13.1
Theoretical coverage sq ft/	1072 (26.2)			
gal (m ² /L) @ 1 mil/25 micron dft		1012	20.2)	

NOTE: Brush or roll application may require multiple coats to achieve maximum film thickness and uniformity of appearance. *See Recommended Systems on reverse side

<u>Drying Schedule @ 5.0 mils wet (125 microns):</u> @ 40°F/4.5°C @ 77°F/25°C @ 100°F/38°C

14.5°C @ 77 F/25°C 50% RH

To touch: 45 minutes 20 minutes 10 minutes

To recoat (minimum), atmospheric service:

8 hours 4-6 hours 1 hour

To recoat (minimum), immersion service:

24 hours 12 hours 10 hours

To recoat (maximum):

12 months 12 months 12 months

To cure, atmospheric service:

5 days 3 days 1 day

To cure, immersion service:

14 days 7 days 5 days

If maximum recoat time is exceeded, abrade surface before recoating Drying time is temperature, humidity, and film thickness dependent. For **Potable Water Service**, allow a minimum cure time of 7 days at 77°F (25°C) prior to placing in service. Sterilize and rinse per AWWA C652.

Application of coating above maximum or below minimum recommended spreading rate may adversely affect coating performance.

CLEAN UP INSTRUCTIONS

Clean spills and spatters immediately with Reducer #15, R7K15 or R7K111. Clean tools immediately after use with Reducer #15, R7K15 or R7K111. Follow manufacturer's safety recommendations when using any solvent.

DISCLAIMER

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative to obtain the most recent Product Data Information and Application Bulletin.

PERFORMANCE TIPS

Stripe coat all crevices, welds, and sharp angles to prevent early failure in these areas.

Spreading rates are calculated on volume solids and do not include an application loss factor due to surface profile, roughness or porosity of the surface, skill and technique of the applicator, method of application, various surface irregularities, material lost during mixing, spillage, overthinning, climatic conditions, and excessive film build.

Excessive reduction of material can affect film build, appearance, and adhesion.

In order to avoid blockage of spray equipment, clean equipment before use or before periods of extended downtime with Reducer #15, R7K15 or R7K111.

Pour a small amount of Reducer #15, R7K15 or R7K111 over the top of the paint in the can to prevent skinning or gelling.

Place a temporary cover over the pail to keep excessive moisture, condensation, fog, or rain from contaminating the coating.

It is recommended that partially used cans not be sealed/closed for use at a later date.

An intermediate coat is recommended to provide a uniform appearance of the topcoat.

Not for use with cathodic protection except as indicated under the recommended systems.

Corothane I KA Accelerator is acceptable for use (except NSF applications). See data page 5.98 for details.

Refer to Product Information sheet for additional performance characteristics and properties.

SAFETY PRECAUTIONS

Refer to the MSDS sheet before use.

Published technical data and instructions are subject to change without notice. Contact your Sherwin-Williams representative for additional technical data and instructions.

WARRANTY

The Sherwin-Williams Company warrants our products to be free of manufacturing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defective product or the refund of the purchase price paid for the defective product as determined by Sherwin-Williams.
